

Action Day – April 2nd 2011 report by Robert Brigg

Our April action day was attended by 14 people 4 of these people were new helpers and the weather was dry and warm.

We started work on Foundry pond where we removed all the dead vegetation in the protected planted areas around the edge of the pond. This will encourage new growth from the plants in these sections. Overgrown branches were also removed and unwanted tree saplings were also cut back. Litter picking was also undertaken in and around the pond area.

We then moved onto Mill Pond where a few new saplings that had started to grow were removed as well as litter in the pond and surrounding area.

Robert clearing Mill Pond

I was also very pleasing to see large amount of frogs spawn in both ponds, this is something I have not seen in these ponds for a long time.

Our next task was to remove some of the weeds in the Harris garden as well as litter picking around the village. The raised garden was staring to look very good with all the different colours of the flowers.

Katy Dunn and her children litter picking

Finally we cut back some of the overhanging willow trees at the bottom end of the main car park as these were dying and may have caused damage to cars that park there.

A very good mornings work.
