

Action Day – August 4th 2012

Report by Robert Briggs
Photographs by Margaret Adnitt

Our August working morning started with a very heavy shower but this soon passed over & the sun came out & 7 helpers arrived.

We split into two groups working on cutting back overgrown footpaths and removing fallen trees that had blocked two of them.

During our morning's work another very heavy shower came down, but despite this, all our working groups worked through to finish their tasks and returned for a well-deserved coffee.

One member of our working team was working by a footpath entrance on Wheeler End Common removing a fallen tree, unfortunately the road alongside was down in a dip and a very large puddle had formed. A speeding car drove through and a large wave of water made us very wet.

Many thanks to all who braved this very wet but rewarding morning's work.
