

## Action Day – March 3rd 2012

Report by Robert Briggs  
Photographs by Margaret Adnitt

Our March working morning started off with light rain but despite this damp start 11 willing helpers attended.

One group worked on litter picking around the ponds and the village.

The other group worked on cutting back last year's dead growth in the planted areas of foundry pond. A broken tree was also cut away and removed. Some rubbish was removed from the pond, this included a bike.

After our mornings work we spent some time in the Harris garden to discuss the new plants required to be planted alongside the wall.

After agreement these plants will be purchased and planted on our April working morning.
