

Action Day – May 4th 2013

Report by Robert Briggs

Our May working morning was a little different as we had the opportunity to hold a meeting with an Invertebrate Consultant, who was looking to identify the different Invertebrates on Moorend Common along with volunteers from our group and any other interested helpers.

We all thought this was a very interesting project and it was agreed that we would go ahead. This will start in May and run through to September.

The first step is to set traps around Moorend Common. We will be starting this project on Monday 13th May at 10.00am, meeting beside the long gate in Church Road (just before the crossroads leading to Freith).

Vivienne Ball agreed to be the project Co-ordinator (tel 01494 883429) or Email.Vivvy642009@gmail.com

At the same time this meeting was being held, a small team worked on the Harris garden and another team litter picked around the village. In total there were 14 people.
