

Action Day – October 6th 2012

Report by Robert Briggs
Photographs by Pauline MacTavish

Despite the heavy rain during the night before our October working morning we were greeted by a sunny and mild working morning.

12 helpers gathered and we worked on cutting the hedge in the main car park that had become overgrown with bind weed and old mans beard plus we also had the years growth of the hedge to cut back.

This task is always undertaken late in the year so as not to disturb nesting birds.

We also cut back with power tools the overgrown surrounding area on one side of the hedge to give good access to maintain this hedge.

A small group also litter picked around the village.
